Trade Van Racking - Package Matrix

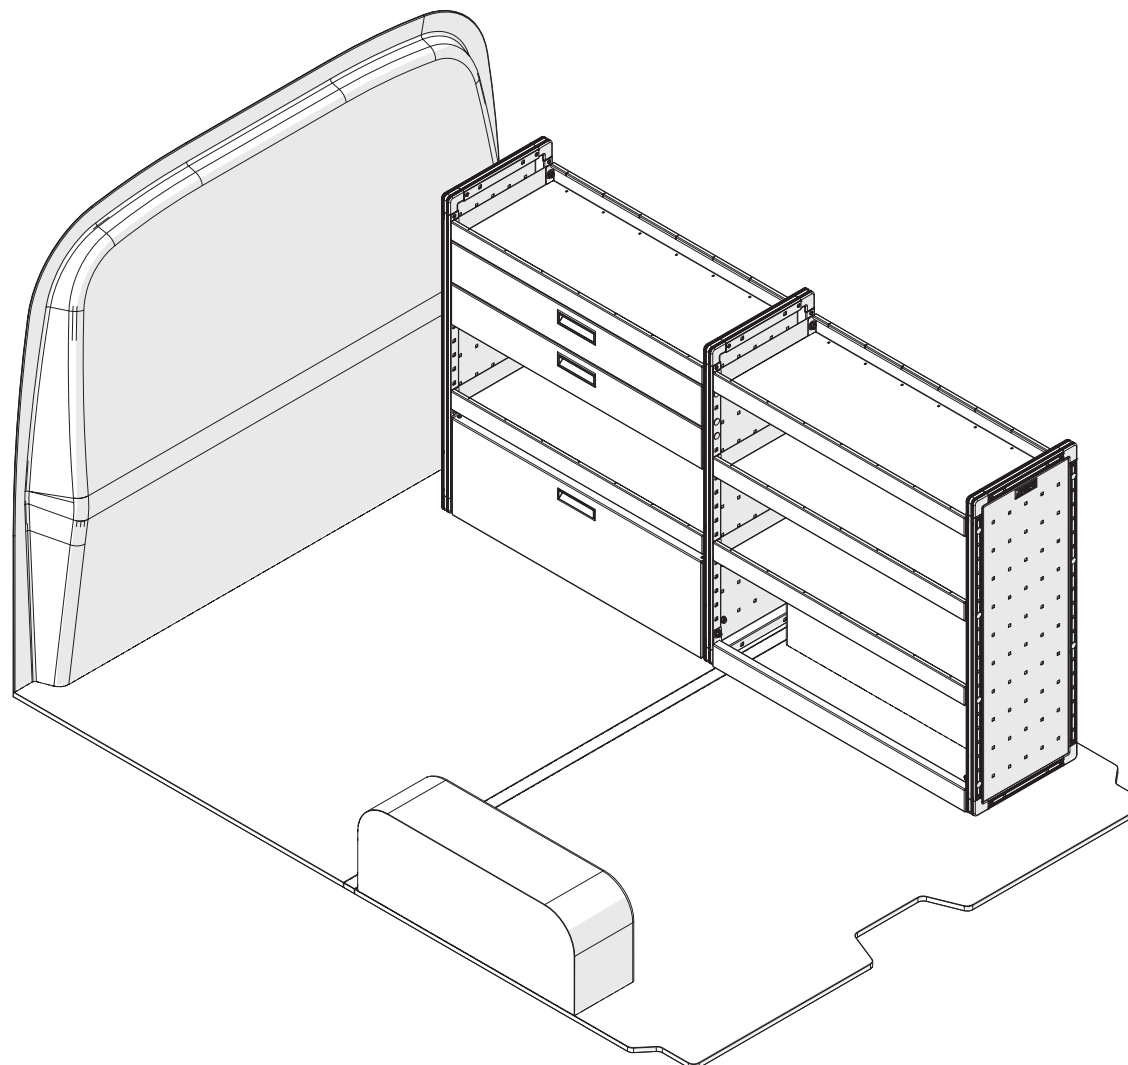

Attention:

For customers installing one of our vehicle-specific packages, please consult this document first. Use the matrix on page two to identify your vehicle and be directed to the appropriate page which showcases the recommended racking layout and indicates the specific positioning of each unit size.

Once you have identified the layout, refer to the 'General Assembly and Installation' manual for instructions on assembling your racking system.

Customers installing universal or bespoke units do not need this document and should proceed directly to the 'General Assembly and Installation' manual for assembly and installation instructions.
